PROFESSIONAL EXPERIENCE

Senior UI/UX Designer Sep 2022 – Present
Metaversity Technologies Pvt. Ltd.

Designed end-to-end digital products across EdTech, SaaS, FinTech, CRM, Enterprise Applications, E-commerce, and Gaming. Partnered with Product Managers, Developers, QA, and Business Stakeholders to turn complex business requirements into scalable, user-friendly digital experiences.

Intoto — *EdTech · CRM · Enterprise SaaS*

Designed an enterprise SaaS platform that digitizes the complete international student recruitment and admissions lifecycle, enabling universities, students, recruitment partners, ambassadors, immigration teams, and administrators to collaborate through a unified ecosystem.

Key modules: Lead & CRM Management · Application Management · Document Verification · Offer & Admission Workflow · Visa Processing · Student Onboarding · Ambassador & Community Management · Event Management · University / Student / Agent Portals · Analytics Dashboard

- Led end-to-end UX for multiple enterprise modules — user journeys, information architecture, wireframes, and interactive prototypes.
- Built a scalable design system and reusable component library used across all portals.
- Designed responsive dashboards tailored to distinct user roles (university, student, agent, admin).
- Simplified complex, multi-step admission and visa workflows into clear, guided user flows.

Being Indian – Digital Content & Entertainment Platform — *Media · Marketplace · Entertainment*

Business discovery and networking platform connecting users with verified local businesses, with tools for organizations to manage listings, ads, blogs, and events.

Key modules: Business Listings & Categories · Featured Businesses · Advertisement Management · News & Blogs · Events & Community Pages · Reviews & Ratings · Admin & Business Owner Dashboards

- Improved navigation and search experience for business discovery.
- Designed admin workflows for managing listings, categories, ads, blogs, and events.
- Built reusable UI components and worked closely with developers for pixel-accurate implementation.
- Designed a scalable Super Admin Dashboard for content management, advertisements, user management, analytics, reports, and platform settings.

BusinessBay AI-Powered Business Growth Platform — *AI · SaaS · CRM · ERP · Marketplace · Business Management Platform*

BusinessBay.io, an AI-powered all-in-one business platform that enables businesses to manage leads, CRM, ERP, marketplace listings, payments, POS, AI chatbots, NFC digital business cards, analytics, and customer engagement from a single platform.

Key modules: Business Marketplace · Featured Businesses · Reviews & Ratings · Business Dashboard · Lead Management · CRM · Reports · AI Chatbot · NFC Smart Card · Digital Business Profile · Admin Portal

- Led end-to-end UX design for customer-facing applications and enterprise admin dashboards.
- Designed a scalable Super Admin Dashboard to manage users, content, advertisements, categories, reports, analytics, and platform settings.
- Created user journeys, information architecture, wireframes, interactive prototypes, and high-fidelity UI.
- Simplified complex business workflows involving CRM, marketplace management, AI automation, and analytics.
- Collaborated closely with product managers, developers, QA teams, and stakeholders throughout the product lifecycle.
- Delivered responsive web interfaces with a focus on usability, accessibility, and seamless developer handoff.

Additional Projects

Trading Platform — FinTech

Key modules: Portfolio Dashboard · Wallet · Analytics

Word247 — SaaS

Key modules: Admin Dashboard · Workflow Management · User Management

MetaRoulette — Gaming

Key modules: Game Lobby · Rewards · Wallet

UI/UX Designer Dec 2021 – Aug 2022
Techbeliever Technologies (Khiladi Adda)

Techbeliever Technologies is a product-based gaming company behind Khiladi Adda, one of India's leading micro eSports and fantasy gaming platforms. The platform serves millions of registered users and offers real-money gaming, fantasy sports, eSports tournaments, wallet management, and player engagement features across web and mobile applications.

Projects: *GamerPe · Khiladi Adda* — *Fantasy Gaming, Quiz Game*

Designed user experiences for Khiladi Adda, one of India's leading fantasy gaming and micro eSports platforms, enabling users to participate in contests, tournaments, wallet transactions, and gameplay experiences across web and mobile.

Key modules: Lead & CRM Management · Application Management · Document Verification · Wallet Management

- Designed gaming applications for web and mobile, including game-specific UI (health bars, mana bars, HUD elements).
- Created user flows and interactive prototypes to validate design concepts with stakeholders.
- Designed wallet, tournament, contest, profile, leaderboard, and gameplay interfaces.
- Designed intuitive user experiences for gaming and fantasy sports applications.
- Designed dashboards and end-to-end user journeys; developed reusable design components.
- Collaborated with developers for implementation and improved UI consistency across products.

UI/Graphic Designer Jul 2020 – Nov 2021
Appsmediaz Technologies

Appsmediaz Technologies is a software product engineering company specializing in mobile applications, web platforms, SaaS products, AI-driven solutions, and enterprise software.

Projects: *Fyool · Rosa* — *Healthcare, Violence*

Designed user experiences for a healthcare rewards application that enables users to earn cashback on healthcare purchases while providing medicine discovery and healthcare services and Rosa provides key content on gender-based violence knowledge, case management, communication and attitude skills; offers self or supervisor-administered skills assessments; and a community space for users to expand their learning through facilitated remote discussions and distance supervision.

Key modules: Healthcare · Application Management · Document Verification · Wallet Management

- Designed responsive websites and mobile applications, including business and healthcare-focused products.
- Created branding assets — logos, banners, and icons — for multiple concurrent client projects.
- Managed several client relationships simultaneously, running iterative design cycles to meet evolving requirements.
